## About me

Hello, I'm Dimitar. I've engaged in various bootcamps, game jams, and hackathons, gaining experience in diverse projects. I recently led a team in a startup focused on Alternative Tourism, where I was primarily responsible for Frontend Design and Development using React.js, and tools like Figma, Prototipe, and Bootstrap Studio. My skills also include Backend Technologies such as Node.js, SQL, and NoSQL, though I lean more towards frontend development.

## Objective

An entrepreneurial minded and an adaptable young man, seeking full-time employment, that will give me an opportunity to continue to grow my leadership skills as well as expand my technical knowledge. My education in computer science combined with my natural curiosity and an analytical mind allow me to tackle quantitative problems. An ideal job would give me an opportunity to learn new skills, have a vested stake in individual projects, and do something different every day.

## Technologies

- Next.js
- React.js
- Typescript
- Javascript
- Figma
- Git
- Saas
- Tailwind
- Bootstrap5

## Languages

Macedonian	10
Native and i am also fluent in the other south slavic languages	
English	10
Fluent	
German	6
B1-B2	

## Hobbies and Interests

- Gaming
- Reading Books
- Blockchain
- Designing
- Coding/Programming

## Skills

- Communication
- Problem-Solving
- Teamwork
- Creativity
- Work Ethic

## Work Experience

### Frontend Development trainee

**Brainnest,Germany**

23/02/2023 - 15/05/2023

Worked collaboratively in international teams to develop and manually test eight web applications using vanilla JavaScript, HTML5, and CSS3. Our process included rigorous manual testing with Jest to ensure functionality and performance. This experience not only honed my technical skills in web development but also emphasized the importance of teamwork and thorough testing in delivering robust web solutions.

### UI/UX and Frontend Development

**Employouth,Macedonia**

2/4/2018 - 31/3/2021

In my role in this startup I focused on designing and developing web applications for alternative tourism for local businesses, utilizing React for its efficient UI rendering. I employed tools like Prototipe and Figma for crafting detailed design prototypes, enabling effective visualization and testing of user experience flows. Atom was my primary development environment, where I integrated React to create responsive, dynamic interfaces that were aligned with the prototypes and designs, specifically tailored to the needs and expectations of the alternative tourism sector.

### Frontend Development Bootcamp

**ISOURCE LTD,Macedonia**

17/07/2017 - 01/02/2018

**Developing Web Application with HTML, CSS, and JavaScript:** Engaged in the development of a web application using HTML, CSS, and JavaScript, guided by UI/UX design principles. The project involved translating intricate design specifications into functional, visually appealing web interfaces, ensuring a seamless user experience and adherence to design aesthetics. This experience underscored the importance of aligning technical development with user-centered design.

## Education

### Frontend Developer

**Brainster Skopje,Macedonia**

01/10/2022 - 11/01/2024

- 1. Creating an E-Store for a Local Clothing Business:** I developed an E-Store for a local clothing boutique, featuring a range of fashion apparel with user-friendly navigation and detailed product descriptions. The site includes high-resolution images, a secure checkout system, customer reviews, and a fashion blog, along with social media sharing and newsletter updates for new arrivals and deals. This project aimed to enhance the boutique's online presence and customer engagement.
- 2. Creating an E-Store for Local Business Specializing in Jewelry and Antiques:** I created an E-Store for a local business specializing in jewelry and antiques, featuring a selection of vintage jewelry and unique antiques. The platform provides detailed product histories, high-quality images, and authenticity certificates, along with care advice. It also offers virtual consultation services, secure payment options, and a blog that shares the stories behind the items.
- 3. During my studies, I successfully completed approximately 50 diverse projects** both individual and in a team, encompassing a wide range of topics and skills. These projects included software development, data analysis, design, and research, demonstrating my ability to adapt to various challenges and requirements. This experience has significantly enhanced my technical abilities, problem-solving skills, and collaborative teamwork. Each project contributed to my professional growth, providing practical application of theoretical knowledge and fostering a deep understanding of multiple disciplines.

### Frontend React,JS Developer

**Semos Education Center Skopje,Macedonia**

15/04/2021 - 23/05/2021

**Learning and Creating Web Applications with React.js and Redux:** Acquired skills in developing web applications using React.js and Redux during my studies. This involved understanding React's component-based architecture and mastering state management with Redux, essential for building interactive and efficient web interfaces. My focus was on leveraging these technologies to create responsive and user-friendly web applications.

### Bachelor Degree of Engineering and Management of software applications

**Faculty of Informational and Communicational Technologies Bitola,Macedonia**

15/09/2013 - 15/03/2018

- Studied Software Application Development (C# and Java):**
  - Learned to develop software using C# and Java, focusing on code efficiency and scalability.
  - Gained understanding of desktop and server-side applications, API integration.
  - Emphasized object-oriented principles and design patterns.
- Studied Web Application Development (HTML5, CSS3, JavaScript):**
  - Acquired skills in building responsive web applications.
  - Focused on user interface design, accessibility, and interactivity.
  - Learned optimization techniques for web performance.
- Studied Database Management (SQL and NoSQL):**
  - Studied database design and management with SQL (MySQL, PostgreSQL) and NoSQL (MongoDB).
  - Explored data integrity, security, and query optimization.
- Studied Management, Business, and Entrepreneurship:**
  - Covered topics in strategic planning, project management, and team leadership.
  - Focused on financial analysis, market research, and business innovation.

**Field of study: Information and Communication Technologies (ICTs)**

Type of credits: **ECTS**

Number of credits: **183**

**Website:** <https://fikt.uklo.edu.mk/?lang=en>

## Certifications and Awards

- **College Diploma** in Bachelor Degree of Engineering and Management of software applications, Faculty of Informational and Communicational Technologies Bitola,Macedonia, 15/03/2018
- **Brainster Diploma** in Frontend Developer, Brainster, 2024
- **SEMOS Certificate** in Frontend Developer, SEMOS Education, 2021
- **Employouth Certificate**, Employouth Program for Startups, 2019
